INVOLVE have just published some further guidance to help determine who might be involved in your research

See the guidance here.

Please can you help with a survey of patient and public involvement (PPI) in

randomised clinical trials?

Please can you help with a survey of patient and public involvement (PPI) in randomised clinical trials. This work is being co-ordinated by a PhD student at University College London alongside a wider group of researchers, doctors, patients and public individuals from the United Kingdom involved in clinical trials around the world. This survey is for patients and members of the public, and there is the chance to enter a prize draw to win one of ten vouchers worth £50 each for those who complete this survey.

Patient and carer involvement in palliative care research: An integrated qualitative evidence synthesis review

Background: Patient/carer involvement in palliative care research has been reported as complex, difficult and less advanced compared
to other areas of health and social care research. There is seemingly limited evidence on impact and effectiveness.
Aim: To examine the evidence regarding patient/carer involvement in palliative care research and identify the facilitators, barriers,

impacts and gaps in the evidence base.
Design: Qualitative evidence synthesis using an integrative review approach and thematic analysis.
Data sources: Electronic databases were searched up to March 2018. Additional methods included searching websites and ongoing/
unpublished studies, author searching and contacting experts. Eligibility criteria were based on the SPICE (Setting, Perspective,
Intervention, Comparison, Evaluation) framework. Two quality assessments on methodology and involvement were undertaken.
Results: A total of 93 records were included. Eight main themes were identified, mainly concerning facilitators and barriers to effective
patient and carer involvement in palliative care research: definitions/roles, values/principles, organisations/culture, training/
support, networking/groups, perspectives/diversity, relationships/communication and emotions/impact. Evidence on the impact of
involvement was limited, but when carried out effectively, involvement brought positive benefits for all concerned, improving the
relevance and quality of research. Evidence gaps were found in non-cancer populations and collaborative/user-led involvement.
Conclusion: Evidence identified suggests that involvement in palliative care research is challenging, but not dissimilar to that
elsewhere. The facilitators and barriers identified relate mainly to the conduct of researchers at an individual level; in particular,
there exists a reluctance among professionals to undertake involvement, and myths still perpetuate that patients/carers do not want
to be involved. A developed infrastructure, more involvement-friendly organisational cultures and a strengthening of the evidence

base would also be beneficial.

PIRRIST launches PPI guidance for Chief Investigators of surgical trials

The Patient and public involvement Intervention to enhance Recruitment and Retention in Surgical Trials (PIRRIST) project, led by Dr Joanna Crocker, recently launched its PPI guidance for Chief Investigators of surgical trials.

This guidance is based on the findings of the four-stage PIRRIST project, feedback from surgical trial staff and PPI contributors at dissemination events across the UK, and consultation and user testing with a wide range of potential users.

Although it was developed for UK-based surgical trials, it is applicable to any type of UK-based clinical trial.

The guidance is free and available to download from the project website: www.phc.ox.ac.uk/pirrist

What's the Best Way to Give Feedback to Your Doctor? Not an Online Review

Have you ever left a comment about your doctor on a physician rating website? It's likely gone unread.

It's possible your doctor either doesn't know the site exists or isn't interested.

That's the conclusion of a recently released study in the Journal of Health Services Research & Policy that surveyed 1,001 registered doctors in primary and secondary care and 749 nurses and midwives in the United Kingdom. Researchers examined the experience and attitude that physicians and nurse had toward websites that allow patient feedback. They found that about 27 percent of doctors and 21 percent of nurses were aware of feedback about them as an individual specifically.

"We saw a lack of awareness from healthcare professionals of when feedback had been left about the care they delivered, whether as an individual or team," said Helen Atherton, one of the authors of the study and an associate professor in primary care research at England's Warwick Medical School. "Overall, awareness and use by doctors is low."

Doctors, especially general practitioners, also are more likely to feel negatively about online feedback than nurses, researchers found. Read the news article here.

judi slot online

Bonus Dalam Situs Slot *Online* Paling dipercaya. Sebuah situs judi berikan beberapa keuntungan untuk banyak pemain yang tercatat didalamnya. Berwujud selingan tanpa ada batasan lewat jenis permainan, sumber penghasilan untuk juara pula *jackpot* biasanya berwujud bonus besar. Sebab itulah saat ini pencinta *betting* daring makin tambah dan beberapa agen sama sama mengundang perhatian *bettor.*

Namun, harus dimengerti ada pula web palsu siapkan soal sama bahkan juga lebih banyak dari sisi jumlah sampai macamnya. Namun demikian penyuplai itu tak kan memberi hasil riil lebih bonus yang dijanjikannya. Juga si bandar dapat bawa modal *bettor* dan lenyap entahlah ke mana. Telah banyak kejadian sama maka dari itu dibutuhkan kehati-hatian dalam penentuan agen.

Daftar Bonus di Situs Slot *Online* Terpercaya

Salah satu tanda-tanda yang menyatakan web-site judi dapat dipercaya adalah bonus didalamnya ada banyak rupa tapi masih masuk akal serta dirasakan tak terlalu berlebih dari banyak, dan nyaris mirip dengan pasaran web lain. Seluruhnya hal semacam itu dapat diterima beberapa pemain waktu masih aktif serta penuhi kriteria siap. Hadiah yang sering ada di agen bisa dipercaya di antaranya :

Bonus Anggota Anyar **Situs Slot *Online* Terpercaya**

Penyedia situs berikan banyak sekali bonus terhadap banyak anggotanya baik pemain lama sampai pendatang yang baru mendaftarkan sekalinya. Masalah ini kerap dinamakan hadiah *new peserta* dan langsung bisa digunakan waktu penentuan permainan. Jumlah lantas lumayan besar serta termasuk sangat memberi keuntungan buat penerimanya, lantaran dapat meluaskan peluang menang buat pemula.

Selain itu teknik mendapatinya lantas cukup ringan tak perlu

mengikut tingkatan khusus yang termasuk susah. Lantaran waktu melaksanakan register, automatic pemain itu udah terima bonus dikatakan. Walau dia tiada code undangan sekalinya terus dapat terima hadiah.

Hadiah *Turn Over*

Urutan ke dua ada bonus slot online terpercaya yang ditujukan buat pemain aktif mengerjakan permainan, deposito pun *withdrawal* dalam account punya dia. Maka dari itu hadiah ini tak dapat diterima oleh pemain pendatang baru. Jumlah diperoleh juga lumayan besar serta beri keuntungan buat *bettor* lama itu, rata-rata pun terdiri dalam macam type dan bisa diputuskan sendiri oleh penjudi yang mendapatinya.

Dengan tersedianya bonus ini menghadirkan beberapa keuntungan banyak pemain, serta automatis membesarkan peluang menjadi pemenang suatu spekulasi. Sebab itu ketika sudah masuk dalam slot judi paling dipercaya, Anda mesti rajin taruhan serta jadi salah satunya *bettor* teraktif. Sebab, walaupun penjudi tidak lama mendaftarkan akan tetapi termasuk kerap berlaga dapat peroleh hadiah itu.

Bonus Code Unik Undangan atau *Referral*

Ada kembali bonus besar bisa juga diterima 2 orang sekalian adalah pemain lama pula pendatang baru. Masalah ini berbentuk link berisikan blog pemasok judi dengan maksud mengundang *bettor* yang belum masuk buat turut taruhan. Dengan demikian sang pengundang mendapati hadiah menggairahkan dan diterima pun oleh *betting* mania sebagai anggota lewat program itu.

Cara mendapatinya lantas slot resmi gampang, pemain lama membagikannya code antik punya dia ke jaringan jejaring sosial individu seperti *Facebook, Twitter,* Kaskus serta lain sebaginya. Bila ada pihak lain ketarik sampai meng-klik link itu serta mendaftar dianya sendiri, bonus akan diterima kedua-duanya.

Daftar bonus *situs slot online terpercaya* itu tentu menimbulkan perhatian orang yang sedang cari argumen kenapa mesti memberikan uang asli mereka dalam web. Lantaran itu selekasnya daftarkan anda ke agen sah serta buktikanlah sendiri hadiah beri keuntungan buat pemain itu.
