Welcome to the resource to help you plan and develop training and support

This resource is for people who are planning training and support for public involvement in research. It offers advice and guidance to help develop training and support packages specific to your context – whether that's for members of the public, researchers or both.

This resource does not contain 'off the shelf' training programmes or a directory of training courses. We explain why this is the case in [About this resource.](#)

The first five sections of this online resource are also available as a downloadable report – [Developing training and support for public involvement in research](#)
